WE ARE AT THE CROSS-ROADS

The cross-roads are before us. The direction we now take will determine for a long time to come the future of our nation. It will determine whether this is to remain the land of the free, solvent and strong, or whether we will follow the broad road that leads the gullible by easy steps of deficit financing, profligate subsidies, inefficiency, waste, duplications, to debt, over taxation, insolvency and bondage.

We are faced with two basic objectives—economy of government and a balanced budget. Thomas Jefferson gives us some good advise, "I place economy among the first and most important virtues, and public debt as the greatest dangers to be feared. To preserve our independence, we must not let our rulers load us with perpetual debt. We must make our choice between economy and liberty or profusion and servitude." We are at the cross-roads with the present federal budget.

What shall we do? Bureaucrats are trying to sell the taxpayers the gold bricks of deficit financing in times of prosperity. We must put a brake on deficit financing or go broke. Yes, the budget should be cut. The war

10 Mar 1950
excises should be reduced. The efficiency can be increased and waste reduced by enactment of the Hoover Commission recommendations. We demand of our representatives sound and frugal government.

School Census Increases in the 14 years from 1933-34 to 1947-48 amounted to but 652 pupils or from 149,068 to 149,720. In the last two years, however, the census jumped to 156,353 or a total of 7,285. Further increases may be expected in the next few years before a levelling off takes place. To aggravate the housing situation the average daily attendance ratio of the school census has increased from 85 to 90 percent in the period here considered.

During the past two years capital expenditures for Utah schools have reached an all-time high with \$11,934,000, an amount equal to \$1,640 for each of the 7,285 pupils added to the census since 1933-34. During the current year large capital expenditures are continued. A high level must be continued for some years.

Teachers' salaries in Utah have jumped from an average of \$1,387 in 1940-41 to \$2,012 in 1945-46 then to \$3,054 in 1948-49. Salary schedules here have in-

This Is the Mountain West

Heber People Sincere
In Calling Valley
'Paradise of Rockies'

By TED CANNON

Deseret News-Telegram Associate
Editor and Columnist

Coming out of a raging blizzard into sun-swept, glistening Heber Valley with Deer Creek at the south and reflecting the deep blue winter sky, majestic Mt. Timpanogos rising up in the west, a traveler is inclined to agree with the local boosters who term their valley the Paradise of the Rockies.

Since pioneer days the center of Utah's dairying and stock raising industry, beautiful Wasatch County remains one of the state's most prosperous

See Ted Cannon's Scene
Today Column on Page B-1)

valley areas, as solid and substantial as its beautiful old brick sandstone homes and build-

ings. The day we dropped in for a visit to the newly elected Chamber of Commerce officers were sitting together for a picture. We found them at the furniture store of the new president, Harold A. Stevens. The two vice presidents, Dr. Karl O. Nielson and J. W. Jordan, one of the valley's leading stockmen, were on hand for the occasion. Chamber Secretary Gordon Mendenhall had brought along Dr. R. Montague, lecturer, who was in town to address the Heber Knife and Fork Club.

The chamber (its official

RAYMOND GIACCOLLETTI
... runs municipal affairs

name is the Wasatch, not the Heber Chamber of Commerce) is only in its fourth year," Mr. Mendenhall said, "but it has 87 individual members and 52 sustaining memberships and we think we're going places."

He pointed out that eight committees are hard at work on a variety of projects, several of them aimed at increasing the tourist and recreation business which is fast becoming a major item in the valley's economy.

"With the best hunting and fishing facilities in the country, game-filled forests, mountain streams, Strawberry and Deer Creek reservoirs, our warm mineral springs and unmatched scenery all around, what more could anyone ask?"

While Frank Mountford, publisher of the Wasatch Wave, was lining up his picture, the chamber men reported that business the past year generally has been good, especially since the reopening of the Park City mines which employ a number of Heber residents. In addition to the basic livestock and dairying industries, the county has considerable mining activity of its own, at Keetley, and large work crews travel daily also to Park City and down Provo Canyon to Geneva Steel and other industrial plants in that area.

"We've put up several dozen signs throughout the west, and have sent out some 25,000

WILLARD J. DRAPER
... man of many hobbies

brochures on our area," Mr. Mendenhall said, "and the results are showing up in our summer trade."

In the last three years five new motels have been built, the big hotel remodeled, and an extensive remodeling and improvement program carried out at the Homestead, famous hot springs resort at Midway, about five miles west of Heber.

One of the principal concerns of the chamber now is the contemplated road connecting Brighton with the Wasatch Valley. The National Guard has agreed to undertake building this 14-mile link as soon as the weather breaks, and when completed it should give great impetus to the valley's recreational development.

Like most other areas of the West, Wasatch County was hard hit by shortage of water last year. The hay crop was down, and the dairying and stock industries suffered. This year the moisture should be back to normal and some recovery is expected.

"In spite of the dry year, though, our stock came off the summer range last fall fat enough to market without yard feeding," said Mr. Jordan, "probably the only place in the West where that was true."

The stockmen of the area are concerned right now over a threatened cut in their grazing permits on the Uinta Forest for the coming summer. Several meetings have been held and others are planned to try to

MRS. EMMA H. WHERRITT
... remembers first settlers

iron out the disagreements on this subject.

Meanwhile, the city of Heber is in good shape, in the opinion of Mayor Raymond Giaccolletti who's just starting his second term of office. A \$354,000 sewage disposal plant started two years ago is completed and in operation, with 100 per cent participation. An expansion of the city waterworks which will nearly double the storage capacity will be built in the spring. The recently instituted city garbage service is moving ahead smoothly, the municipal power plant is making money, tax collections are very good, the future never looked brighter.

"Our fire department is one of the best in the West," the mayor said. "We have six pieces of equipment now and are planning on getting another."

The department has about 20 volunteer members, serving under the veteran Frank Hardy who has had about 42 years of fire service. In all there are around 43 full time city employees in all departments. The annual budget runs around \$133,000 and the community, from its modern offices in the Memorial Bldg., operates efficiently on a pay-as-you-go basis.

At the beautiful Wherritt home on East Center Street we had a pleasant visit with one of Heber's beloved residents.

CIVIC LEADERS AND VISITOR—Harold A. Stevens, seated left, is new president of Heber Chamber of Commerce. Vice presidents are Dr. Karl O. Nielson, seated right, and J. W. Jordan, standing right. Standing at left is Syd R. Montague, former Mountie, adventurer and philosopher, in town for Knife and Fork Club appearance.

years, Mrs. Wherritt, now nearing 77, keeps busy with a number of interests. For 20 years she was president of the county DUP chapter, and helped get out the historical book, "Under Wasatch Skies." She was county Red Cross chairman for 16 years, and has been active in the American Legion Auxiliary and the Ladies Shakespearean Club.

"I've always kept busy," she said, "even as a girl I worked as a bookkeeper in the old A. Hatch & Co. store (later the Heber Mercantile Club), and was a charter member of the Utah Business and Professional Women's."

"I don't believe in just sitting around and growing old, and in spite of a touch of arthritis I knit, do needlepoint, watch television and read novels and keep track of what's going on."

Another of Heber's prominent ladies we called on is Mrs. J. T. (Marvel) Murdock, former president of the Utah Woolgrowers Auxiliary, and immediate past president of the National Woolgrowers Auxiliary. She too is active in community life, in addition to keeping up a lovely home. President of the First Ward YWMA for the past five years she also helps out with the VFW canteen which is doing a splendid social work with the city's teen-agers.

"I love working with the young people," she said. "It

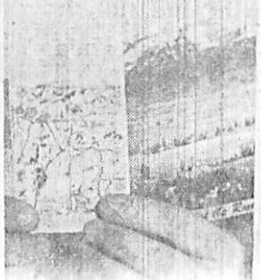

MRS. J. T. MURDOCK
... headed national group

helps keep us young too, and there are no finer youngsters anywhere than ours here."

A man we wanted to see but missed because he was out of town was Dr. Willard J. Draper whose numerous hobbies include gardening, stone masonry, carpentry, interior decorating and cooking. The latter accomplishment he devotes to community service every year when he puts on a smorgasbord feast in connection with the annual March of Dimes campaign. Earlier this month for the fourth year he performed this annual labor of love, and a total of around 800 people were served, bringing the drive fund to close to \$3,000.

Wasatch County lists about 5,700 residents, of whom just about 3,000 reside in Heber. The area has never had a boom—doesn't expect one and doesn't want one. "Steady and solid is the best way to describe us," Mrs. Wherritt observed, "to which we would add, 'cheerful and friendly, too.'"

... AND THE BARREN PLACE IS A FRUITFUL FIELD

171

The staff of the Wasatch Wave, pictured here in 1889, included: Front row, left to right, George Barzee, Pearl Buys and William Buys. Back row, Ephraim McMillan, Daniel McMillan, Joseph A. Murdock, Lucinda Buys and George A. Fisher. The newspaper has been published continually since 1889.

PUBLISHING

Underlying the growth of nearly all Heber business firms has been the support of the community newspaper, the Wasatch Wave. Someone once said that the formula for business success was "Early to bed, early to rise, work like the devil and advertise." The opportunity for merchants to advertise their goods or services came in the pages of the newspaper, and certainly helped in no small way to expand community business.

The newspaper was first published in 1889 in the north room of the Court House. William H. Buys, the owner, editor and manager of the paper, worked feverishly to bring the first issue into being. The hand-set, Cheltenham light-face type had arrived late from Salt Lake City and Mr. Buys burned a lot of midnight oil to get the type set and the issue ready for the March 23, 1889 publication date.

The biggest news in the four-page first issue, of course, was the birth of the paper, which Mr. Buys said was "but a tiny ripple on the great ocean of journalism." It may have seemed "tiny" then, but the newspaper has grown in size and in service until it is considered one of the state's best weekly newspapers today.

LITHOGRAPHED IN U. S. A.

172

HOW BEAUTIFUL UPON THE MOUNTAINS

The front page of the first issue of "The Wasatch Wave" published March 23, 1889.

Assisting Mr. Buys in his publication efforts were George Barzee, Joseph A. Murdock, Ephraim McMillan, Dan McMillan and George A. Fisher who was the "printer's devil." Orilla Buys, the owner's eldest daughter, helped whenever possible. Charles Glanville also published the paper for a time.

In 1910 the Wave Publishing Company was sold to Charles N. Broadbent and his sons who owned the paper until 1939 when Frank Mountford purchased it. John Wallis had published it two years before this sale. The Mountford family still owns the paper, with James

Mountford, a son of Frank, as the publisher. Farrell Reynolds, a long-time employee of the firm, assists Mr. Mountford.

Arch Davis and his first barbershop in Heber.

Mountford, a son of Frank, as the publisher. Farrell Reynolds, a long-time employee of the firm, assists Mr. Mountford.

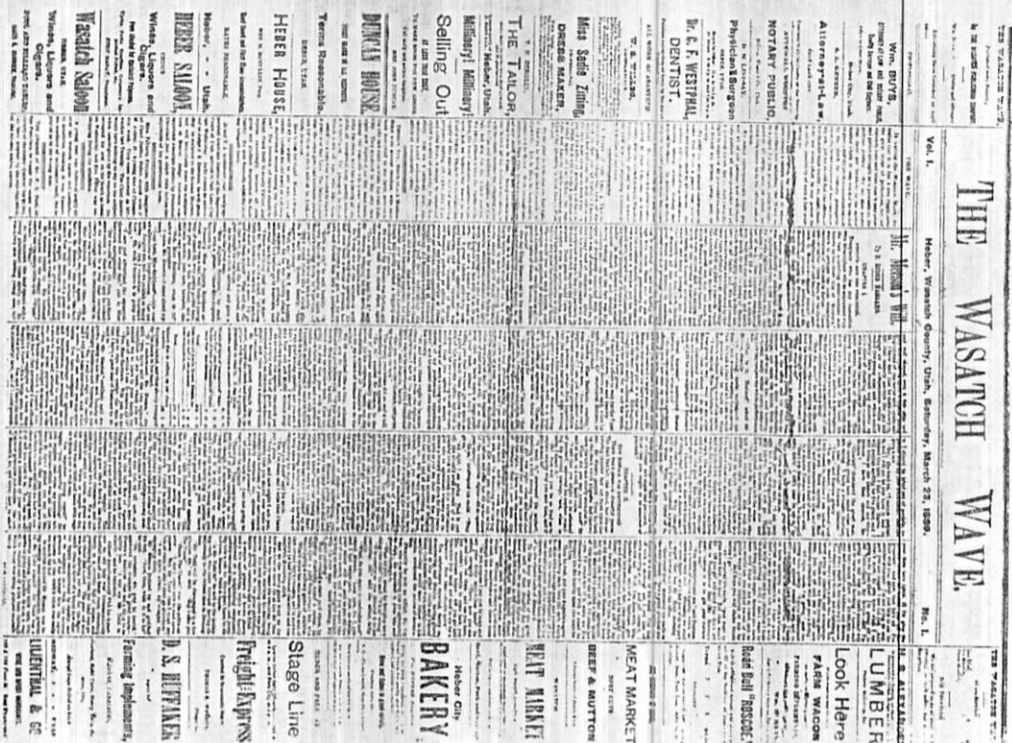

BARBERS

Barber shops also played their part in the business and service picture of the community. One of the best early barbers was A. L. Davis who operated a shop on "Hatch Row" for many years beginning in 1902. For sanitary reasons, each regular customer had an individual shaving mug and brush that bore his name in large gold letters and often had a picture suggesting his individual trade or business.

Another early barber, Frank Epperson, opened his shop in 1905 and served the community continuously for more than 50 years. Albert Dixon worked with him for many of those years. Early advertisements by Mr. Epperson were for 25c haircuts and 15c shaves.

Some of the barbers who have worked in Heber, either in their own shops or shops of others include Will Wheable, Roe Duke, Doris Dayton, Bill McNaughton, Gene Land, Homer Branderberg, Rone Moulton, Warren Hicken and a Mr. McDaniel who was always called "Mac."

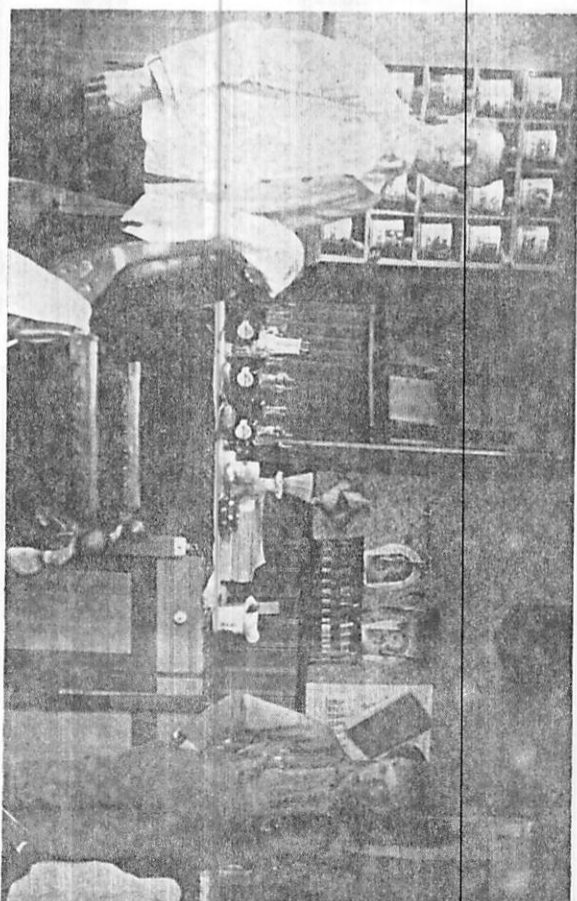

Those presently in business are Earl Dayton, Ramon Duke, Lyman Duke, Paul Probst and Rufus (Bood) Hicken.
